ELEKTRONİK OTO ALTERNATÖR REGÜLATÖRÜ
ELECTRONIC REGULATOR FOR VEHICLE ALTERNATOR

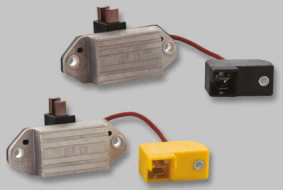
Type **C** Tipi

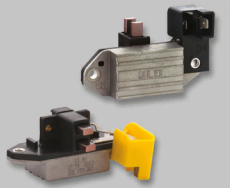
ELO Kodu Code: 202.053.001 (13.8V) / 202.053.002 (14.3V) / 202.053.003 (24V)

202.053.005 (12V Kablolu / With Cable) / 202.053.006 (24V Kablolu / With Cable)

Sahip olduğu elektronik devre özel izolasyon malzemesi kaplandığından nem ve vibrasyondan etkilenmez. Diğer modellerden farklı olarak alternatör alan sargısına pozitif (+) enerjinin direkt ulaşmasını sağlar.

Aynı zamanda regülatör çıkışındaki güç transistörü, o anki şartlara en uygun frekansta negatif (-) enerjinin alan sargısı diğer kutbuna ulaşmasını sağlar. Alan sargısı paralelindeki yüksek voltaj diyodu, alan sargısında zaman zaman meydana gelebilecek voltaj sıçramalarına izin vermemektedir.





The inside electronics is protected by a watertight sealing and it is resistant to vibration and other environmental effects. In contrast to other regulator models, the positive energy (+) is transmitted directly to the field coil of the alternator. At the same time, the power transistor at the output of the regulator transmits the negative (-) supply to the other terminal of the field coil, at the most appropriate frequency according to the current conditions.

The high voltage diode parallel to the field coil prevents the voltage peaks in the field coil, which may occur from time to time.
